Software Engineer (Part Time)

Please apply online at http://www.adimab.com/careers/.

Description

Adimab is looking for a part time software engineer. The successful candidate will work with Adimab’s internal technology team to develop cutting edge web based research tools. The role is focused on front end, UI/UX engineering.

Requirements

- Strong knowledge of HTML, CSS and Javascript (JQuery preferred)
- Previous web design experience
- Motivated, passionate individuals who love technology
- Ability to work independently and meet deadlines
- Experience with scientific research preferred

About Adimab

Adimab conducts antibody drug discovery for the world’s top pharmaceutical companies. Adimab’s yeast-based monoclonal antibody discovery platform functions like a synthetic human immune system to create novel antibody therapeutics across a broad range of diseases from cancer and autoimmune diseases to serious infectious diseases. Adimab is backed by top-tier venture capitalist firms including Polaris Venture Partners, SV Life Sciences, Orbimed Advisors and Google Ventures.

Adimab is located in New Hampshire’s beautiful Upper Connecticut River Valley, just minutes from Dartmouth College, Dartmouth Medical School, the Tuck School of Business, the Thayer School of Engineering and Dartmouth-Hitchcock Medical Center. For more information, visit http://www.adimab.com.
